# Cambrai Community Nursery

The Cambrai Community Nursery is managed by Mid Murray Landcare SA, supported by Mid Murray Council and SA Murray Darling Basin Natural Resources Management Board

*This project is supported by the SA Murray-Darling Basin Natural Resources Management Board through funding from the Australian Government's National Landcare Programme and the NRM levies.*

The Cambrai Community Nursery is supported by local volunteers who propagate and maintain the nursery to provide native plants to landholders. We have resources available to help you plant a garden to attract native butterflies and low fire risk plants. We also grow native grasses and can provide seed for your own projects.

Our project manager can also assist with plant identification.

We also hold monthly workshops, a great way to meet local people and learn new things. Contact us if you would like to get on the email list to receive notification of upcoming events.

Mid Murray Landcare SA supports the Habitat Stepping Stones Project to grow and supply plants for Food and Shelter to support our local wildlife. See species below or more details.
